

Motivate Kids to Love Science

10 Ways to Motivate

- Make scientists and science cool for boys and girls.
- Be a positive role model: deal with errors gracefully and keep your cool.**
- Connect science to the everyday - include careers and life improvements from science..
- Bring science to life using demonstrations and mock crime scenes.**
- Give students opportunities to apply what they've learned like contests using science to solve a problem.
- Challenge your students...but not too much setting tasks at a level where they attain success.**
- Allow students a realistic level of choice in kinds of tasks and work partners.
- Use praise and assessment feedback that rewards students for effort and improvement.**
- Make positive relationships by supporting and reassuring their efforts.
- Incorporate technology like cell phones, digital measuring devices where possible.**
